

Dr. Cheng-Te Lin received his Ph.D. degree in Materials Science and Engineering at National Tsing Hua University (Taiwan) in 2008. In 2012, he was a postdoc in the group of Prof. Jing Kong and Prof. Gang Chen at Massachusetts Institute of Technology (MIT, USA), respectively. Since 2014 June, he is working as a full professor at Ningbo Institute of Material Technology and Engineering. Dr. Lin has 221 SCI publications in ACS Nano, Advanced Functional Materials, Advanced Science, and Biosensors & Bioelectronics etc with a total citation over 14,500 and an H-index of 55. Currently he serves as an associate editor in Biosensors & Bioelectronics. His research interests focus on the development of graphene-based biosensing techniques.
